

THAT'S THE WAY THEY WERE DESIGNED, THEY WORK BEST THAT WAY

There are some things in life that are better left alone. The tendency in this country is to make changes to almost everything. Sometimes changes are necessary and good, but some things were meant to never change and should remain the way they were created from their inception. They were designed to work in a way that was best for the individual, the family, society, and the world. Things like honesty, fidelity, a strong work ethic, a strong moral base, proper education, and a society that begins with self-respect for oneself and moving on to family, community and country.

The concept of freedom and democracy should never change; we must always be a nation of law, tempered with mercy. We must promote what is good and oppose all that is evil. It is really pretty simple, if you encourage people to be independent, they will, and if you encourage them to be dependent that will they also do. If you encourage them to save, they will, if you discourage savings and encourage spending that will they also do. If you put a premium on education people will learn. If we punish those who are trying to live responsibly and allow criminals to get away with murder, well I think you get it, society is changing but not in the way that works best, nor the way it was designed to work.

I once had a 1986 Ford Thunderbird and it was a beautiful car. Two door, Champagne in color, and fully loaded, there wasn't a scratch or ding on it. It purred like a kitten and had all original equipment; it even had the owner's manual in the glove box with all of the recommendations for service in it.

One day a friend had fallen upon some hard times. Her health was failing, she was struggling economically, and to make matters worse, her car broke down. She still had to work but had no way of making it there without transportation. So after much discussion my wife and I decided to sell her the car at far below Blue Book value.

I will skip through the details and get right to the point. Not long after she received the car we found out her husband had PROCCEEDED TO MODIFY THE CAR...Noooo! He put in wheel wells and installed custom rims and replaced the originals with big tires. This changed the whole suspension and caused the transmission and drive train to go out. It affected the brakes system, changed the speedometer reading, and computer system, Oh! Did I mention he painted it black?

You see, the car was designed in a way in which it would perform best and changing that design caused the car to become a total wreck. It was not designed to work that way.

In 1776 The Declaration of Independence was written. Soon after the beginning of the American Revolutionary War, the leaders of the war got together to write a letter to the King of England, explaining why they were fighting to be their own county, independent of England. They proclaimed their independence and referred to the laws of Nature and of God as their defense.

Joy In Life

These Inalienable Rights state; *We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.*

This was the basis and foundation of the United States Constitution in whose preamble states that it is “*We the people*” of the United States, in Order to form a more perfect union, establish justice, insure domestic Tranquility, provide for the common defense, promote general welfare, and secure the Blessings of liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America. Simply put it was a system put into place that would positively work in the way in which it was designed.

From the creation God has wanted to bless mankind and have us succeed in all that we did. He created each and every human being with a divine purpose so it was His responsibility to give us clear guidance on how to achieve all He had designed us to do. He knew what would work best, after all God is the designer, so He gave us His Spirit, a heart, a conscience, and incredible brain with its ability to love and reason and just to be on the safe side He gave us His Word, the Bible as our owner’s manual. It has everything we need to know to keep running at top performance with power. 2 Timothy 3:16-17 – ***Every scripture is God breathed (given by His inspiration) and profitable for instruction, for reproof and conviction of sin, for correction of error and discipline in obedience and training in righteousness. So that he man of God may be complete and proficient, well fitted and thoroughly equipped for every good work.***

Some things are better left alone among those being Democracy, freedom, liberty, the Word of God, and my Thunderbird. **That’s the way they were designed they work best that way.**

ANYBODY PLAY GOLF?

So I am working diligently on my golf game, I know I will never be great at the game but I have really cut down on my strokes just by practicing. I was working on a few tips and I thought, if I applied some of the principles I practice on my golf swing (not to mention the time, effort, and money) I could play life a whole lot better. In golf you have your bad holes and your good holes, the key through practice should always be improvement.

Here are the tips:

Golf - Make sure your clubface is squared and pointed to the target.

Life - Squarely face the day with your mind pointed towards your goal.

Golf - Stay balanced and follow through on your swing.

Life - Take the time to enjoy life, have fun, relax, eat right, and exercise.

Golf - Do not try to help the ball up.

Life - You do what you do and let God do the rest.

Golf - Strike the ball first.

Life - Take the initiative, don’t wait for life to come to you, go out and live it.

Golf - Control distance by backswing and trajectory by ball position.

Life - You get out what you put in, make the effort. Tee the ball high and watch it fly.

God Bless & have a great month, Alex

Our job is to let you know how much God loves you.

Best Wishes & Much “Joy In Life”
